## EDUCATION

---

**Universidad de los Andes**  
B.Sc. Systems and Computer Engineering  
Minor in Computational Mathematics

*July 2015 - June 2021*

## WORK EXPERIENCE

---

### **Mo Technologies (Backend Developer Intern)**

*July 2020 - Present*

- Developed the current web application that the enterprise uses to request the build and deploy of the different environments for each project. (**Django, React**)

### **Cleverlynk (Frontend Developer)**

*June 2020 - Present*

- Developed, improved and maintained user interfaces of an e-commerce platform that enables the creation and distribution of catalogs without a domain or webpage. During the first 3 months of operations (May 2020 - August 2020) Cleverlynk had around 65.000 visits and generated sales for clients of approximately 100.000 USD in total. (**React, AWS**)

### **Especios Bogota (Software Developer)**

*January 2019 - June 2019*

- Developed an application in Java which improved the quotation's process speed on a 70% .

## PROJECTS

---

### **Yachay (November 2019 - January 2020)**

*Software Developer - Angular, HTML, CSS*

- Developed a web application, which displayed information about drug's history, abuse, prevention and policies.
- Currently being used as main tool of information in the course 'Education, Youth and Drugs' at Universidad de los Andes.

### **EPS Andes (August 2019 - December 2019)**

*Software Developer - SQL, Java*

- Developed an information management application which answered different queries about the main medical services in Colombia.
- Achieved a maximum response time of 3 seconds in any search query on the database, which had more than 1 million records.

### **IntelSavings (October 2017 - December 2017)**

*Software Developer - Java, Kotlin*

- Developed a mobile application, which allowed Universidad de los Andes's students save their money.
- Achieved by displaying a list of restaurants with menus accesible to their incomes and saving goals.

## ACHIEVEMENTS

---

### **Hackatrix Bogota, Colombia (Belatrix Hackathon)**

*September 2019*

- 1st place at the Hackatrix 2019 out of 48 teams.
- Developed a web tool to avoid food waste by connecting restaurants with government's soup kitchens.
- Developed a web tool to record the amount of people in extreme poverty on distinct neighbourhoods.

### **ICPC Programming Competitions**

*2018-2019*

- Honorable Mention at the 2019 South America-North Final.

### **Academic Scholarship**

*July 2015*

- Universidad de los Andes's scholarship due to excellent results at National standardized test and academical excellence at school.
